Young Implantologist Podium

October 19th 2024

The International Academy of Contemporary Dentistry (iACD) has established the Young Implantologist Podium to inspire the next generation of dentists to create practical and innovative solutions for the numerous medical challenges encountered in daily dental practice. If you have a research idea in progress or a clinical best practice to share, we want to hear from you. Since ideas thrive when nurtured in a constructive environment, a credentialing committee comprising Main Podium speakers will serve as mentors to evaluate each presenter's work. As a participant in the Young Implantologist Podium, it is my hope that you will receive invaluable feedback from leading experts in the field, allowing you to refine your ideas and enhance your research.

Additionally, iACD will offer the following prizes to the top two performers:

- First prize: \$500 USD, a certificate of achievement, and one complimentary full-conference registration for next year's iACD Implant Symposium.
- Second prize: Certificate of achievement and one complimentary full-conference registration for next year's iACD Implant Symposium.

The Young Implantologist Podium also serves as a training ground for those aspiring to become regular presenters at international conferences and symposiums. Recognizing the field of implant dentistry is filled with promising young talents, iACD will provide an opportunity to present at the Main Podium in a future symposium to anyone who wins the Young Implantologist Podium three times.

We are seeking passionate and ambitious young professionals dedicated to clinical and research innovations to join the inaugural cohort of the Young Implantologist Podium competition.
